
User Support meeting update

Suchandra Thapa

Sep 1, 2015

Xenon1T

- Workflow using Geant4 and Root
 - Using connect client on RCC (local HPC cluster)
 - Demonstrated scaling to 10k jobs with each job generating 100 events (~1M events, 2.1 GB of output)
 - Working on writing up results and presenting results to user
-

Freerunner

- Workflow understood and working on pegasus workflow implementation
 - Need to meet with Don to determine how workflow used (e.g. as a science gateway, etc.)
-
